WORKING PAPER

- Santoianni, D.A., M.F. Bingham, D.M. Woodard, and J.C. Kinnell. 2008. "Power from Animal Waste—Economic, Technical, and Regulatory Landscape in the United States." *Journal of EUEC* Volume 2, Paper #01. Available at <http://www.euec.com/journal/documents/pdf/Santoian ni.pdf>.

Mrs. Woodard has several years of experience with supporting research efforts for Section 316(b) compliance evaluation and natural resource economics and with writing and editing documentation. To support Veritas' 316(b) compliance evaluation work, Mrs. Woodard helped write Data Submission, Strategic Assessment, Proposal for Information Collection, and Benefit Valuation Study reports for many power plants. She also edits 316(b) compliance and natural resource documentation and helps create figures illustrating economic theory. She helped create and administer surveys for decision analysis and natural resource economics research. In addition, Mrs. Woodard helped analyze and report survey results.

KEY PROJECTS

Helped evaluate economic feasibility of electricity production from animal waste biomass as a manure-management strategy

Wrote documentation on recreational and commercial fisheries research for Benefits Valuation Studies for 14 power plants in the midwestern and eastern U.S.

Conducts research on recreational and commercial fisheries in states throughout the U.S.

Helped write evaluation of potential economic benefits resulting from thermal discharge reductions at one power plant in the eastern U.S.

Helped write screening-level Benefits Valuation Study for one power plant in the eastern U.S.

Helped write Strategic Assessment reports for three power plants in the eastern U.S.

Helped write Proposal for Information Collection reports for two power plants in the eastern U.S.

Helped write Data Submission reports for two power plants in the midwestern U.S.

Helped create hundreds of figures illustrating economic theory.

Helped create and administer an internet-based survey for an international company, using decision analysis techniques to determine the company's compliance with internal health and safety guidelines and fielding the survey in eight languages.

Created, fielded, administered, analyzed results, and wrote summary reports for two surveys for an international company.

Helped create, fielded, analyzed results, and wrote summary reports for several other internet-based surveys.
